Subject: Microsoft Settlement

Hello,

I beleive the proposed settlement, will in the end, do little to dissuade Microsoft from continuing to abuse its current market position. It absoulutely has been shown they will stifle any technology that is of any potential threat to them.

Netscape was effectively killed off as just one example.

Please send a clear message and impose strict enforceable standards on Microsoft so REAL innovation is not stepped on in the future.

Thanks for your consideration.
